The Premier Journal in Science & Technology

The *Journal of Vacuum Science & Technology* offers ground-breaking editorial covering applications in semiconductors (particularly thin films), plasmas, surfaces and properties and processing of electronic materials.

JVST readers include engineers, physicists, chemists, material and microelectronic scientists, technologists and other specialists working in all branches of microelectronic and thin film materials processing.

With print and online content reaching more than 6,000 scientists and engineers worldwide including 4,300 members of the AVS Science and Technology of Materials, Interfaces and Processing, the *Journal of Vacuum Science & Technology* is a highly-targeted and effective marketing tool.

Online Advertising AVS Buyer's Guide • www.avsbuyersguide.org

Is your company listed on the AVS Buyers' Guide, the principal online AVS resource for prospective purchasers of scientific and technical equipment and services? The Guide's searchable database presents company and product information, including web and e-mail links. Visitors will have access to the Technical Resources section offering utilities such as conversion calculators, reference materials and periodic tables.

Featured Product Listings offer corporate logos and product profiles linked to your company listing and allow users to access more complete information about your product including a four color image, specifications and measurement, and any additional information. It's like having your own online brochure or spec sheet!

Logo Link Listings enhance your corporate image with priority placement in search results and by adding your corporate logo. By doing so, your listing is automatically linked to your corporate website!

Basic Listings are free of charge to all companies exhibiting at the current year's AVS Fall Meeting. Non-exhibiting companies can purchase a basic listing. Listings stay active for a full year and can be updated at any time.
