ISI Impact Factor

Impact Factor: 2.384

Publishes research papers on the chemistry, physics, and biology of Earth and planetary processes. Interdisciplinary papers are especially encouraged. G³ seeks original scientific contributions pertaining to understanding the Earth as a system, including observational, experimental, and theoretical investigations of the solid Earth, hydrosphere, atmosphere, and biosphere at all spatial and temporal scales. Co-published with the Geochemical Society.

Water Resources Research

ISI Impact Factor

Impact Factor: 1.894

Print & Online

Volume 44

ISSN 0043-1397

An interdisciplinary journal integrating research in the social and natural sciences of water. Contains original contributions in hydrology; in the physical, chemical, and biological sciences; and in the social and policy sciences, including economics, systems analysis, sociology, and law.

ISI Impact Factor

Impact Factor: 1.084

Carries original scientific contributions on all aspects of electromagnetic phenomena related to physical problems. Covers the propagation through and interaction of electromagnetic waves with geophysical media, biological media, plasmas, and man-made structures. Coverage includes, but is not limited to, the application of electromagnetic techniques to remote sensing of the Earth and its environment, telecommunications, signals and systems, the ionosphere, and radio astronomy. All frequencies (including optical) are considered.

Co-published with the International Union of Radio Science.

Space Weather: The International Journal of Research & Applications

Editor

Louis J. Lanzerotti,
*New Jersey Institute
of Technology*

ISI Impact Factor

Impact Factor: 1.610

An online publication that fosters the research-to-applications information transfer between space weather researchers, forecasters, and data users. Contains peer-reviewed technical papers as well as news and feature articles on the latest developments in the field from around the world.
