

Applied Physics Letters

apl.aip.org

Most highly cited journal in applied physics (Thomson, 2007)

Applied Physics Letters is a distinguished weekly journal featuring concise, up-to-date reports of new findings in applied physics. Emphasizing rapid dissemination of key research, *Applied Physics Letters* offers prompt publication of significant experimental and theoretical papers bearing on applications of physics to all branches of science, engineering, and modern technology.

Subject Coverage

- Lasers and Optoelectronics
- Semiconductors
- Plasmas and Electrical Discharges
- Structural, Mechanical, Thermodynamic, and Optical Properties of Condensed Matter
- Electronic Structure and Transport
- Organic Electronics and Photonics
- Magnetism and Superconductivity
- Dielectrics and Ferroelectricity
- Nanoscale Science and Design
- Device Physics
- Applied Biophysics
- Interdisciplinary and General Physics

2009 Publication Frequency

Volumes 94, 95 (52 issues)
Content published online daily

Format

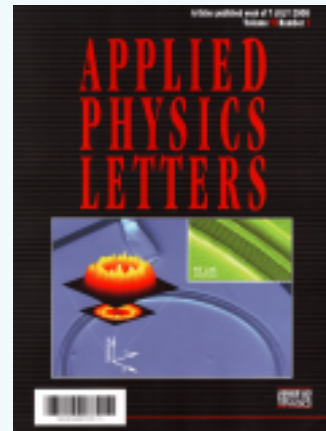

Print, online, CD-ROM

Online Backfile

1962-2008

ISSN Print: 0003-6951 Online: 0077-3118
