# Computing in Science and Engineering

[cise.aip.org](http://cise.aip.org)

## The magazine of computational tools and methods for 21st century science

Scientists and engineers increasingly rely on computation for their research. *Computing in Science and Engineering (CISE)*:

- Communicates to those at the intersection of science, engineering, computing, and mathematics
- Is interdisciplinary
- Emphasizes real-world applications and modern problem-solving
- Is peer-reviewed

Every issue contains broad-interest theme articles, departments, news reports and editorial comment. The intended audience comprises physical scientists, engineers, mathematicians, and others who would benefit from computational methodologies. *(CISE)* is a joint publication of the American Institute of Physics and the IEEE Computer Society.

### 2009 Publication Frequency

Volume 11 (6 issues)

### Format

Print & online
