

Geological Society of America Bulletin

gsajournals.org

GSA Bulletin publishes definitive, timely, and relevant works related to all aspects of geoscience. Readers will find classical-style research papers in all earth-science disciplines from a top-notch roster of international contributors. The *Bulletin* offers multiple avenues of access, including from such sites as gsajournals.org, crossref.org, and doi.org. The publication is peer reviewed by an editorial board and science editors drawn from the best researchers in the field, and accepted articles can be published online in as little as eight weeks. Regular media coverage includes Science, Science Daily, MSNBC.com, World Oil, CN Money, Discovery Channel, and U.S. News and World Report.

Articles cover a broad spectrum of the geosciences, including:

Geochemistry • Geophysics • Hydrogeology • Marine Geology • Paleoclimatology • Planetary Geology • Quaternary Geology/Geomorphology • Sedimentary Geology • Stratigraphy • Structural Geology • Tectonics • Volcanology
