

# Journal of Environmental and Engineering Geophysics

<http://www.segdl.org/jeeeg>

The *Journal of Environmental and Engineering Geophysics* (JEEG) is the official journal of the Environmental & Engineering Geophysical Society (EEGS). Since its first issue in 1995, JEEG has provided articles that address topics of interest on the application of geophysics to the environmental and engineering fields. JEEG is unique in that it reaches beyond the traditional geophysicist to a diverse group, including practitioners in civil engineering, geotechnical engineering, hydrogeology, and mining engineering. Special topic issues are published periodically. JEEG is a peer-reviewed journal published quarterly. In recent years, JEEG has published special issues on ground-penetrating radar, seismic surface waves, geophysics in China, and geophysical characterization of glacier and ice sheets. JEEG became part of the SEG Digital Library during 2008.
