Journal of The Electrochemical Society

ecsd.org/JES

**The only journal bringing you the best in electrochemistry
and solid-state science**

The *Journal of The Electrochemical Society* (JES) is a peer-reviewed publication, providing today's most authoritative research in solid-state and electrochemical science and technology. Subjects covered include: batteries and energy storage; fuel cells and energy conversion; corrosion, passivation, and anodic films; electrochemical/chemical deposition and etching; electrochemical synthesis and engineering; physical and analytical electrochemistry; dielectric science and materials; semiconductor devices, materials, and processing; sensors and displays: principles, materials, and processing; and nanostructured materials, carbon nanotubes, and fullerenes. Articles are posted online as each becomes available. ECS journals have consistently had impact factors among the top ten for publications in the field of electrochemistry. The intended readership includes research scientists, engineers, technologists, and graduate students in solid-state and electrochemical science and technology.

2009 Publication Frequency

Volume 156 (12 issues)

Format

Print, online, CD-ROM

Online Backfile

1948-2008
