# Journal of Mathematical Physics

[imp.aip.org](http://imp.aip.org)

**One of the five most highly cited journals in mathematical physics (Thomson, 2007)**

Serving theoretical and mathematical physicists, this international journal presents original research detailing new developments in the mathematical formulation of physical theories, in mathematical methods for the solution of physical problems, and in mathematical ideas suitable for physical applications.

The journal cuts across all fields of study, providing links between specialists in different areas of physics. Original articles place their research in context, beginning with the general physical or mathematical problem addressed and following with the specific approach taken. The journal assesses no page charges.

An annual special issue provides in-depth focus on a particular topic; topics range from statistical mechanics to fluid dynamics to quantum information theory.

### 2009 Publication Frequency

Volume 50 (12 issues)  
Content published online daily

### Format

Print, online, CD-ROM

### Online Backfile

1960-2008

**ISSN** Print: 0022-2488

Online: 1089-7658

**CODEN** JMAPAQ

### ISI's Data (2007)

Impact Factor: 1.137  
Immediacy Index: 0.312  
Cited Half-Life: > 10.0
