# Journal of Rheology

## rheology.org

**The premier international forum covering research on flow and deformation of complex materials**

For more than 50 years, this distinguished journal has been a vital resource for researchers working in fields as diverse as polymer physics and fluid mechanics. It presents experimental results, phenomenological models, and microscopic theories dealing with the rheological behavior of complex materials, including macromolecular, colloidal and particulate solids and fluids. Practical examples of such materials include foods, paints, plastics, lubricants, ceramics, coatings, glaciers, and biological fluids.

The *Journal of Rheology* features:

- Regular contributions from countries worldwide
- Rigorous technical review to ensure the highest editorial and production standards
- Rapid publication

The *Journal of Rheology* provides in-depth interdisciplinary coverage of theoretical and experimental issues drawn from industry and academia. It is published for professionals and students in chemistry, physics, engineering, materials science, and mathematics.

### 2009 Publication Frequency

Volume 52 (6 issues)

### Format

Print & online

### Online Backfile

1929-present
