# Journal of Physical and Chemical Reference Data

Published by the American Institute of Physics for NIST  
[jpcrd.aip.org](http://jpcrd.aip.org)

**Authoritative resource for critical, evaluated reference data  
for the physical sciences and engineering**

Provides critically evaluated data in physics and chemistry. All data are fully documented with original sources, the criteria used for evaluation, and tabular and graphical presentations of recommended values. Ideal for academic researchers, students, and industrial scientists.

The journal now includes new collections from the IUPAC Solubility Data Series, as well as many other compilations from groups such as CODATA (Fundamental Constants) and other international data activities.

### 2009 Publication Frequency

Volume 38 (4 issues)  
Content published online daily

### Format

Print, online, CD-ROM

### Online Backfile

1999-2008
