

# Physics Today

physicstoday.org

**Complete backfile and current issues now available online!**

*Physics Today*, the most influential and closely followed physics magazine in the world, provides original articles and timely news on ground-breaking research in physics and related sciences. Fresh perspectives on contemporary technical innovations, basic and applied research, the history of science, education, and science policy are easily accessible.

## Online Options

All institutional subscribers now have online access to a 5-year backfile as well as the most recent online issue. Institutions can choose to provide online access to the complete *Physics Today* archive from the very first issue in 1948. **AIP Complete** & **AIP Select** subscribers automatically receive the entire 60-year backfile.
