A weekly publication of the American Institute of Physics

May 4, 2015

## Director's Matters

*Guest column by Melanie Mueller, Assistant Director, Niels Bohr Library and Archives*

### Expanding NBL&A resources to include meteorology

The Niels Bohr Library and Archives (NBL&A) collects books, oral histories, and photographs to document the history of physics, astronomy, geophysics, and related sciences, and we collect the archival record of AIP and all of its Member Societies. When the American Meteorological Society (AMS) joined our federation in 2013, we embraced the opportunity to expand our coverage of the physical sciences to include meteorology and climate science.

Our first phase of meteorology collection development began [in 2014, when we hired Roger Turner](#) (PhD in History and Sociology of Science, and member of AMS) to develop a bibliography of around 500 meteorology titles to add to our book collection.

## Off the Press

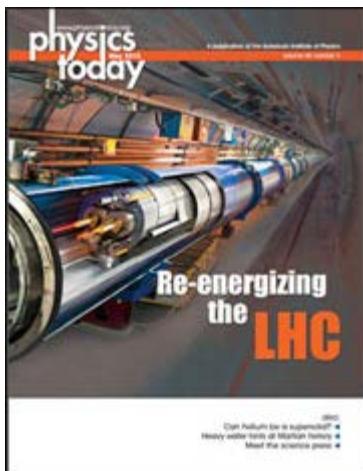

### *SPS Observer, Spring 2015 issue*

Cover: SPS member Nicole Johnson takes a selfie with a quadrupole magnet at the CERN museum near Geneva, Switzerland. Learn more about her research on glass and how you can get involved in research in this issue's feature section, "On Doing Research." Photo by Nicole Johnson.

### *Physics Today, May 2015 issue*

Cover: During a two-year shutdown of the Large Hadron Collider

(LHC), workers at CERN carried out tests, repairs, and upgrades to ready the world's most powerful accelerator for higher-energy collisions. On 10 April, two beams of 6.5-TeV protons began countercirculating around the 27-km-long ring, and soon full-on 13-TeV collisions are to begin. Magnets in the accelerator tunnel are shown here. ## Around AIP

### ACP opens its art exhibit, *Flow*

*Excerpt from exhibit brochure by Sarah Tanguy, Curator*

Exploiting the malleability of natural phenomena and materials, the artists in *Flow* elicit wonder in works that draw far-reaching human parallels. As they explore the cycle of life and the vicissitudes of change, the final destination, rich in possibilities, remains as yet unknown.

## Coming Up

May 5

- AIP Cinco de Mayo social (College Park)

May 6

- ACP Blood Drive, 10 am-3 pm (College Park)

May 10-15

- CLEO 2015 (San Jose, CA)

May 13

- Birthday celebrations (College Park and Melville)

May 14

- AIP Publishing Board of Managers meeting (Melville)

May 18-22

- ASA 169th Meeting (Pittsburgh, PA)

May 19

- AIP Publishing 1-year anniversary celebration of its new Melville office (Melville)
