

Field of Employment for New Physics Bachelors Employed in the Private Sector

- STEM refers to natural science, technology, engineering and mathematics.
- Regularly solving technical problems includes respondents who selected “Daily”, “Weekly”, or “Monthly” on a four-point scale that also included “Rarely or Never”.
- Almost half of new physics bachelors entered the workforce after receiving their degree, two-thirds of which were working in the private sector.
- Data are from AIP’s Follow-up Survey of Physics Bachelors, classes of 2015 & 2016 combined.
